# GASTRONOMY

WITH ISOLED<sup>®</sup> SUSTAINABLY REDUCING ENERGY COSTS

## Meeting place of good spirit and place of encounter

Gastronomic establishments are the meeting point

- of good spirit and conviviality,
- of pleasure and indulgence,
- of relaxation and deceleration,
- of communication and entertainment,
- of friendship and romance,
- of business and leisure

and they are definitely a meeting place that promises people a particularly enjoyable experience. The guest wants to immerse himself in another world!

# YOUR ADDED VALUE WITH ISOLED®!

## Standardised Product range

- More than 3,050 products
- High-end LED components
- High product availability

## Intelligent project lighting solutions

- Scalable LED control technology
- Holistic LED lighting systems
- Personal project support

## Customer-specific Manufacture

- Manufactured light elements
- Precise custom production
- Delivery ready for installation

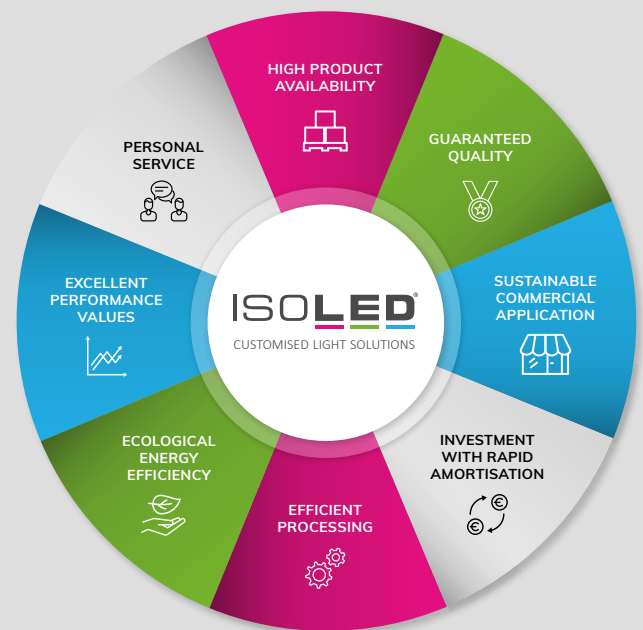

## CUSTOMISED LIGHT SOLUTIONS

SUSTAINABLE EFFICIENCY IMPROVEMENT  
WITH SMART LED LIGHTING CONCEPTS

We are a full-range LED supplier for individual lighting concepts and orient ourselves in the design of our wide product range to both the

- Requirements of our customers as well as on the
- technical progress of LED technology.

Excellent quality, high consulting competence of our employees as well as sustainable growth of our company ensure a reliable and long-term demand coverage with innovative LED lighting solutions for our partners.

# 99,3 %

**We advise you!**

We develop and plan your individual solution together with you.

We realize your project!

# THE NEW PRODUCT CATALOGUE COLLECTION ISOLED® 2024

All good things come in fours! For a targeted customer approach, our new collection of ISOLED® 2024 product catalogs is divided into four issues. This means that you always have the right catalog with the appropriate product groups at hand. In the spirit of sustainability, you can of course also browse through all catalogs online.

## Four topic-specific Catalogs

- » 1200 pages full of highlights
- » Available in: DE, EN, FR, IT & HU
- » Online flip catalog and up valuable print version
- » Prefabricated lighting components
- » Individual lighting concepts
- » Sustainable, intelligent lighting solutions
- » Custom-made products and OEM production

We advise you personally and support you with the realisation of your projects!

## DISCOVER ISOLED® ON YOUTUBE

Want to know what the United Glare Rating is all about? Or how to professionally install a drywall profile?

On our new YouTube channel you will find a constantly growing collection of videos on assembly instructions, product worlds, practical applications and knowledge topics.

**YouTube** VIDEOS ON ALL LED TOPICS

## Up to 80 % cost reduction

Fast amortization of investments made and strong cost reduction (with LED illuminants from ISOLED® up to 80 % cost saving compared to traditional illuminants) immediately relieve the running operating costs.

Transparency of your investment costs with a payback calculation from ISOLED® is possible at any time.

We are looking forward to your inquiry!

## WHY LED?

### ALL ADVANTAGES AT A GLANCE

LED ARE ENERGY AND COST EFFICIENT

LEDS ARE NOT HAZARDOUS WASTE

WATERPROOF LEDES

LED ARE ROBUST AND INSENSITIVE

LEDS GENERATE LIGHT IMMEDIATELY

CONTINUOUSLY ADJUSTABLE

LED INVESTMENT WITH FAST AMORTIZATION!

LOW HEAT EMISSION

# CUSTOMISED ASSEMBLY

Focus your efforts on your core competences.

## WE TAKE OVER THE PROFESSIONAL MANUFACTURING!

We are a customer-oriented company and, in addition to our extensive product range, offer services with sustainable added value. This includes, among other things, the professional assembly of light building elements with LED flex stripes, LED aluminum profiles and their additional components, which we are happy to take over for you.

You save valuable working time!

You can immediately start with the installation!

You have the certainty that your LED lighting will work reliably!

**We advise you.**

## LED EMERGENCY / ESCAPE LIGHTS

LED emergency light/escape  
route luminaires

## EMERGENCY LIGHT OPERATION 3 HOURS

### LED panels and linear Tri Proof Luminaires with battery pack

ISOLED® Luminaires with integrated rechargeable battery pack (see page 85 Battery module for LED panels and page 109 Pro-fessional Linear-Diffuser luminaire) ensure basic lighting in of-fices, workshops, basements and underground car parks in the event of a power failure, even without an emergency power supply unit or central battery system.

### New in the range UNI4 and UNI7 emergency light/escape route luminaires conforming to standards

With our two emergency light/escape route luminaires UNI4 and UNI7, their detection range of 20 and 18 meters respectively and the four enclosed escape signs to stick on (arrow pointing up/down/left/right), you can implement the marking and signage of escape and rescue routes safely and conforming to standards.

### Integrated battery for 3 hours emergency operation

The UNI4 LED light has a 1,500 mAh Ni-cd battery and the UNI7 has a 1,900 mAh battery, which enables battery operation for more than 3 hours in the event of power failures (charging time approx. 24 hours).

Switched continuous operation is also possible as an option when the power supply is maintained.

### Automated self-tests replace manual function checks

After the initial installation, the luminaires carry out a self-test, a function test once a week and a long-term test 36 hours after the initial installation and once a year. The periodically prescribed and time-consuming manual function checks are therefore no longer necessary.

### Note on the operation display

Manual tests can be initialized at any time by pressing the integrated test button. Correct operation is indicated by a green signal LED, errors by a red signal LED.

## Safety in case of emergency

In the event of a power outage or failure of the general power supply or lighting system, enough lighting (emergency lighting) must be ensured to safely exit the building or to avoid panic.

### European standard for labelling

The legal requirements regarding lighting requirements and marking of escape and rescue routes are regulated in the European standards EN 50172:2005 and EN 1838:2019.

### Recommendation for planning

To plan an emergency lighting system in your building, we recommend that you consult an expert in the field. We would be happy to put you in touch with a partner in your area.

## Guidelines for emergency light/escape route luminaires

Basically, the following applies to emergency lights and escape route luminaires etc:

-  **Placement at least 2m above the ground** (visible from both sides)
-  **Distance <2m for each exit door to be used in an emergency**
-  **Distance <2m for every stair, height or direction change**
-  **Escape signs must be illuminated in the event of a power failure**
-  **Distance <2m from any first aid box or fire alarm point**
-  **The minimum lighting intensity on escape and rescue routes is 1 lux on the ground,**
-  **where the ratio of maximum to minimum lighting intensity must be <40:1.**
-  **(At machines or places with special hazards 15lx at light median <10:1**

### Note on planning emergency lighting systems

When planning an emergency lighting system, we recommend consulting an expert in this field who can guarantee compliance with all European standards.

All illuminants including technical details can be found in the new product catalog ISOLED®

## On the pulse of progress

Driven forward by the innovative power of our specialist team as well as the increasing demands for our customers and the market, taking into account the latest technologies, we develop and design much improved and completely new LED components, products and lighting systems.

## Unique through customised

In close cooperation and intensive exchange of our product management team with the production side research & development team, trendsetting, solution oriented and custom lighting concepts with the highest economic and environmental energy efficiency arise.

**Our customers and partners benefit consistently from quality, functionality and efficiency.**

Sustainable Performance Values and Stable Light Quality

- Precision Manufacturing Processes
- Latest LED Technology
- Strict Quality Criteria

# YOUR PARTNER

ISOLED<sup>®</sup> SINCE 2008

## Licensed partnerships

SIGNIFY = PHILIPS

# PRODUCT QUALITY AND DESIGN

## SUSTAINABLE QUALITY

### Your quality requirements are our touchstone

For our customers and partners, we undertake to sustainably supply lights, lighting construction elements and systems, control equipment based on the latest LED technology, as well as all services in

- best and guaranteed quality,
- with the greatest possible ecological efficiency as well as
- economic stability of value sustainably.

#### ISOLED® Data sheets

Real performance data measured under real conditions are published in a data sheet for each item. Every customer has direct online download access.

### Sustainable quality and operational safety

The complete LED ISOLED® product range is CE-marked and therefore complies with the requirements for product conformity according to the latest EU guidelines.

A tested and certified CE product coordinator from ISOLED® takes on the implementation of all ongoing internal standards and cross-checks of the EU regulations. Supplier audits ensure compliance with the CE requirements by the manufacturer.

The heart of our light laboratory are the two ultrabright spheres (diameter 0.5 m and 1.7 m), which are used to measure photometric data.

### Trust through data transparency

#### REAL PERFORMANCE DATA

The satisfaction of our customers and partners is achieved through data transparency. As part of a regimented multi-stage quality control programme, we test and measure all photometric parameters and in addition to numerous additional details, include these within our product datasheets. Our specified performance data are NOT the result of physical or theoretical calculations, but they correspond to the photometric values of the final overall product actually measured in our in-house light laboratory. (I.e. including reflectors, optics, housing - measured under real ambient conditions, etc.)

On request, we can of course also provide specific reports from our photometric test laboratory.

Whether it is a new acquisition or a conversion to LEDs, both cases are long-term investments. Against this background, it is of particular importance to consider the following quality features in the decision-making process:

- Materials of the individual components (e.g. aluminium housing)
- Glasses and covers
- High-quality workmanship (pay attention to seams and connecting pieces - small proportion of load-bearing plastic elements)
- High quality lacquers
- TÜV certification
- Protection class IP (dust and water protection)
- D-marking acc. EN 60598-24 (LED lights suitable for use in fire-endangered locations)
- Glare factor (UGR acc. EN 12464)
- Timeless and architecturally integrating aesthetics

#### **Your quality standard is our touchstone!**

The matching LED illuminants are of tested quality and designed for commercial use. LED branded products from ISOLED® consist exclusively of high quality components that are manufactured with selected materials in modern and innovative production processes. Only tested LED chips and standardised components (excellent quality classes) are used.

They convince with their performance values:

- service life
- Light quality
- Luminous flux
- Light intensity
- Color rendering
- Color temperature
- Connected load
- Heat generation (cooling) etc.

### **LED chips and components of the highest quality classes**

LED branded products from ISOLED® consist exclusively of high-quality components, which are manufactured in selected materials in modern and innovative production processes.

Only tested LED chips and standardised components (excellent quality) are used. Our LED products must meet the prescribed performance values in accordance with the strictest quality and test criteria without any complaints in order to be finally released for sale.

# ADVANTAGE THROUGH KNOW-HOW

## Improving consultancy skills

We combine many years of experience in technical application areas with LED know-how and pass both on to our employees.

With a deep understanding of the economic and environmental efficiency of LED light solutions, as well as enthusiasm for this sustainable and environmentally friendly type of lighting, they support our customers and partners through each LED project.

## Specific customer training

We have a major interest, in training you and your employees in the topics of

- ISOLED® Product knowledge,
- ISOLED® application technology,
- LED basic knowledge and
- LED sales

for basic training and further development.

„Confidence comes with knowledge, this is why we share our expertise!“

ISOLED® Team

## ISOLED® ACADEMY

### TAKE ADVANTAGE OF OUR OFFER

We offer **onsite and offsite training** . Whether in-house, by phone or webinar - you and your employees will receive all information and documents from us.

- » LED know-how
  - LED technology basics
  - ISOLED® product training
  - ISOLED® workshops for LED application technology
  - ISOLED® Workshop “Lighting design with DIALux”
  - Customer-specific LED workshops
- » ISOLED® sales support for customers, partners and their staff

**We would be happy to create your personal training program tailored to your team!**

**Please contact us and book your individual workshop!**

- LED starter support for trade and crafts
- Target group definition/market approach - How to reach your target customers (ISOLED® industry focus)!
- 100% LED - targeted argumentation with facts. With knowledge you score points with customers!
- 100 % ISOLED® - this is how you and your customers benefit from the ISOLED® range of services!
- Customer-specific ISOLED® workshops

## ACADEMY

# MORE THAN "JUST A WEB-SHOP"

In our extensive online portal you will find everything your "LED heart" desires. Whether knowledge, training or video instructions - we provide you with all the materials and services that you or your customers need.

## KNOWLEDGE

**ADVANTAGE THROUGH KNOW-HOW. WE SHARE OUR KNOWLEDGE!**

Bundled knowledge on important topics from LED technology as well as application-specific assistance and instructions.

## INDUSTRY FOCUS

**YOUR ASSISTANT FOR ACHIEVING JUST THE RIGHT APPEAL FOR YOUR BUSINESS!**

We support you in your target group-oriented market approach with our ISOLED® sector focus.
