

LED HALL LUMINAIRES LINEAR  
**150/200 WATT**  
**IP65**

PRODUCT WORLD

## LED LINEAR LUMINAIRES IN 150/200 W, IP65

### MEANWELL transformer included

The LED linear luminaires with 150 W (120 cm length) and 200 W (150 cm length) in protection class IP65 from ISOLED® are equipped as standard with an external high-power transformer from MEANWELL and a 3-pole supply cable (20 cm) and are available in neutral or cool white.

### Homogeneous, glare-free light quality

The high-performance high-end LED boards (50,000 operating hours) are **FLICKERFREE** and together with the electronics safely installed in an extremely robust aluminium housing with shock- and impact-resistant (ball-proof) PC cover. With the diffuse PC cover (frosted) a homogeneous as well as glare-free light quality is achieved, which significantly extends the field of application.

### Important note

These LED linear lights from ISOLED® are made of high-quality and solid materials for long-term use. For this reason, the dead weight of the LED linear luminaires must be taken into account when mounting them on ceilings, beams and the building structure for the purpose of operational safety (LED linear luminaire 120 cm/8.2 kg; LED linear luminaire 150 cm/12 kg).

## CUSTOMISED LIGHT SOLUTIONS

SUSTAINABLE EFFICIENCY IMPROVED WITH SMART LED LIGHTING CONCEPTS

ISOLED® offers a standardized LED product range with over 2,200 branded items in

- » best and guaranteed quality,
- » with the greatest possible ecological energy efficiency,
- » with personal service and
- » efficient processing,
- » in a fair price-performance ratio,

with which future-oriented LED lighting solutions as well as intelligent LED lighting concepts with short amortisation times can be realised.

## 99% of our customers and partners recommend ISOLED® !

### Top service and advice

With excellent product quality, personal advice and first-class service, we create clear competitive advantages.

### High product availability

We offer a wide range of more than 2,200 high-quality branded products with immediate availability.

### Delivery 95% on the next working day

We are usually able to dispatch all orders received by 11am on working days on the same day.

## LED LINEAR LUMINAIRES IN 150/200 W, IP65

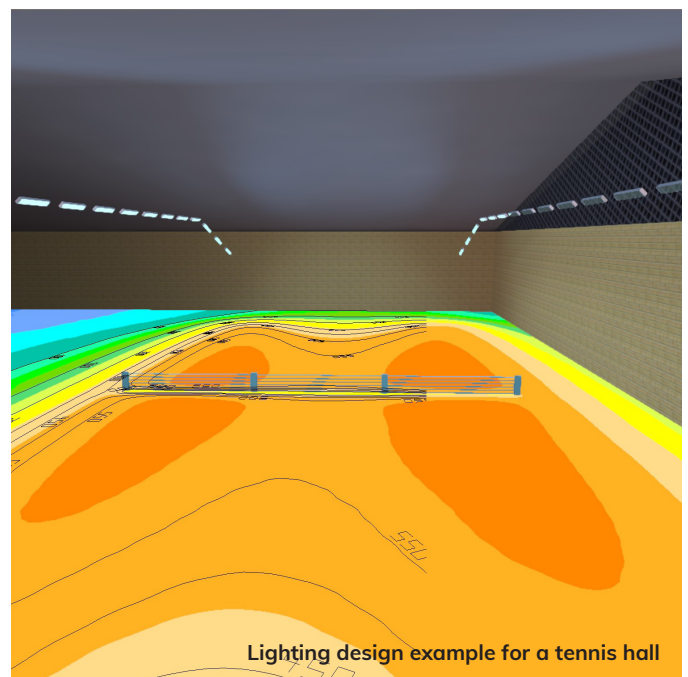

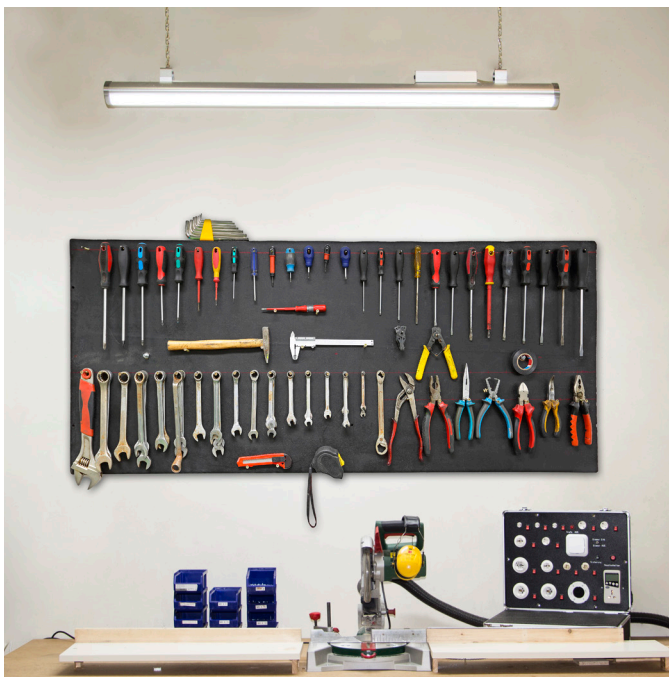

### Areas of application

- » **Tennis, sports and multi-purpose halls** Excellent homogeneous lighting conditions for competition and training (ball-proof LED luminaires)
- » **Workshops and production sites** Excellent glare-free illumination for safe and accident-free work
- » **Warehouses and high-bay warehouses** No glare for warehouse personnel (very important for forklift drivers!)

### 45° radiation possible

The LED linear luminaires are mounted with horizontally adjustable mounting modules (ring suspension) directly or with chains on beams or on the building structure (mounting with 45° radiation possible).

### Glare-free LED factory/plant and warehouse lighting

People-oriented LED lighting solutions increase the attractiveness of the workplace and are a direct value-adding factor for the employer. Optimally designed LED lighting solutions

- » promote productivity,
- » increase performance,
- » increase the effectiveness,
- » have a vitalising and stimulating effect,
- » reduce accidents at work and sick leave and
- » lead to sustainable cost savings.

### Low operating costs with best light quality

Due to the simple and quick assembly, the robust, impact-resistant and ball-proof design and excellent the LED linear luminaires are very popular and frequently used in indoor tennis courts due to their simple and quick installation, their robust, impact-resistant and ball-proof design and their excellent performance values.

The maintenance-free LED linear lights create perfect, glare-free lighting conditions for competition as well as training and convince with the flicker-free high-end LED boards. When switched on, the players have light immediately (in contrast to metal vapour lamps, which need up to 20 minutes for full light output. Advantage: high switching frequency possible).

By switching the LED linear luminaires via different phases, the number of luminaires switched on can be adjusted to the amount of light required/demanded if necessary, thus saving additional energy and costs.
