## WOOD LIVES - AND WE „LIVE“ WOOD

OUT OF LOVE AND CONVICTION FOR ONE OF THE OLDEST BUILDING MATERIALS EVER!

Since 35 years Holzbau Lengauer-Stockner stands for

- » quality,
- » reliability,
- » adherence to delivery dates and
- » a balanced price-performance ratio.

The experienced team convinces with a high degree of professional competence and stands by its customers and clients at all times with advice and support- from the planning stage through the construction phase to long after the project has been completed!

### **Residential/commercial and agricultural construction | interior finishing | renovation of old buildings**

Holz prägt den Charakter eines Gebäudes und vermittelt ein Wood shapes the character of a building and conveys a natural sense of well-being and creates a pleasant indoor climate. Due to its special insulation properties, ecological and economic requirements can be fulfilled sustainably. Therefore Holzbau

Lengauer-Stockner GmbH has many customers from trade, agriculture and industry.

### **With a quantum leap into the future!**

With the construction of the new company site, the Lengauer-Stockner family has invested sustainably in the future. On 2.300 m<sup>2</sup> in the 10 m high production hall all orders are processed.

- » with proven methods and
- » innovative technology
- » precisely manufactured on the latest equipment.

The main building includes office and meeting rooms, the technology/research & development department and a locksmith's shop. The design of the entire building is in line with the company's values and is based on the highest ecological and economic efficiency.

„The ecological idea, energy efficiency and sustainability are always very important to us as a timber construction company. That's why we only use LEDs for our new company building.“

- » Guarantee of a fast spare parts supply
- » Rapidly acting after-sales service and unbureaucratic returns management
- » Appropriate company size and sustainable company development for a long-term cooperation based on partnership
- » Short delivery times

## LIGHT AS A VALUE-ADDED FACTOR

Human-oriented light increases the attractiveness of the workplace and is therefore a direct value-added factor for the company. Light from LED panels with a glare factor of  $UGR > 19$  has a vitalising and stimulating effect on employees and drives processes of ideas and creativity.

### Sustainable cost savings and

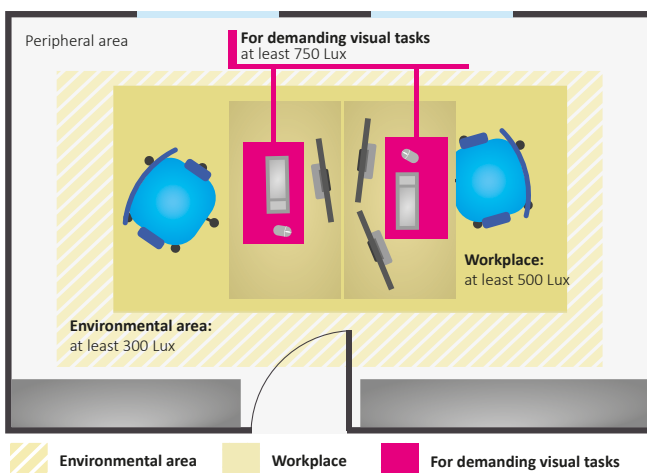

- » Produktivitätsförderung sowie Leistungssteigerung,
- » Reduktion der Krankenstände,
- » Effektivitätssteigerung.

### Optimally adapted to the visual tasks of the employees

The company Holzbau Lengauer-Stockner GmbH has chosen LED panels (50 W) with the glare factor  $UGR < 19$  in neutral white of ISOLED®.

These were set into self-made wooden frames and fit seamlessly into the overall picture of the offices and meeting zones.

### Minimum illuminance at the workplace in the office

According to the DIN EN 12464-1 standard, office workplaces need to be illuminated with at least 500 lux; in subareas where special visual tasks are performed, the minimum requirement is 750 lux (e.g. in monitor areas).

The specifications for peripheral and surrounding areas of an office room are much lower. Here, 300 lux is already sufficient to comply with the standard.

# FASTFIX THE MODULAR LED LINEAR SYSTEM

Highly efficient with up to 130 lumen/watt  
Continuously dimmable for perfect lighting conditions  
FLICKERFREE and TÜV-certified  
Expandable at any time!

## **Sustainable lighting solution for Trade and industry**

The modular LED linear system FASTFIX is very powerful (up to 130 lumen/watt) and can be extended with a current feed up to 10 amperes per phase.

This corresponds to a continuous light line of 150 m (with 3-phase supply). The radiation angle of the individual modules can be changed at any time using exchangeable lenses.

## LED OFFICE PRO FLOOR LAMP

HIGHEST ENERGY AND COST EFFICIENCY!

*So lang es Holz auf unserer Erde gibt,  
so lange Menschen leben,  
so lang wird's Zimmerleute geben.*

High performance | 30 W + 30 W  
UGR<19  
Dimmable  
Optionally with daylight and  
Motion control

## FEEL-GOOD ATMOSPHERE AND HIGHLIGHT STAGING

The spacious entrance area is bright, inviting and conveys a friendly atmosphere of well-being. An LED 3-phase track system with swivelling spotlights (neutral white | 4,000 K) contributes to the general room lighting and stages very specifically selected highlights of the room. The beam angle of the spotlights can be individually adjusted in the range from 35° to 50°.

### Homogeneous light lines

LED Flexband 15 W (colour temperature: 4,200 K; output: 1,500 Lm/m) + LED recessed aluminium profile with opal/satinised cover
